Connecting to Cisco AnyConnect VPN Client

1. Launch Internet Explorer and browse to vpngate.umsmed.edu.

2. “UMMC SSL VPN Service” screen appears. Enter your Network username and password. Click Login.
3. If "Security Alert" dialog pops up, click Yes.

4. The VPN Client will be automatically installed and connected. Click OK.
5. “Connection Established” will be indicated on the screen. An icon circled in the image below will appear in your Taskbar. Right-click the icon to open the connection or to disconnect.
